2020	10th, KV AFS Gurgaon , Haryana	85%

PROJECTS

• Real-Time Collaboration Platform [↗](#)

- Built a **Google Docs-style collaborative editor** using **Yjs CRDT library** for conflict-free real-time sync
- Architected **WebSocket-based presence system** with live cursors and per-section viewer tracking
- Engineered **version history with time-travel slider** using differential snapshots, supporting **50+ concurrent users**
- **Stack:** React, TipTap, Yjs, Node.js, PostgreSQL, Redis, Docker, AWS EC2

• E-Commerce with Real-Time Inventory & Flash Sales [↗](#)

- Designed **real-time inventory system** with Redis caching, reducing stock update latency to **under 50ms**
- Built **flash sale queue using BullMQ** with rate limiting, handling **10K+ concurrent checkout attempts**
- Implemented **faceted search with Meilisearch** achieving **sub-100ms search** across 100K+ products
- **Stack:** Next.js 14, TypeScript, PostgreSQL, Redis, BullMQ, Stripe, Supabase Realtime, Tailwind CSS

• Real-Time Dashboard Builder [↗](#)

- Built **sandboxed SQL execution engine** with connection pooling supporting PostgreSQL and MySQL
- Created **drag-and-drop widget system** with real-time data refresh via **WebSocket** at configurable intervals
- Implemented **shareable read-only dashboard links** with role-based access control
- **Stack:** React, TypeScript, Node.js, Go (Fiber), PostgreSQL, Redis, ECharts, Docker
